High-Efficiency Solar Electric (PV) Systems For The Commercial Sector

Solar from IGS dramatically reduces your operating costs by protecting you from rising energy costs.

- PV systems have no moving parts and require little or no operation and maintenance support
- After-tax returns of 15-25% (common) generate thousands of dollars in savings
- Government incentives can cover 30% (or more) of the total cost of a new solar system
- Financing and leasing options are available to help avoid upfront investment costs
- Significantly reduces your overall operating costs
- Helps you meet government-mandated greenhouse gas emissions
- Promote your company as a “Green Business”

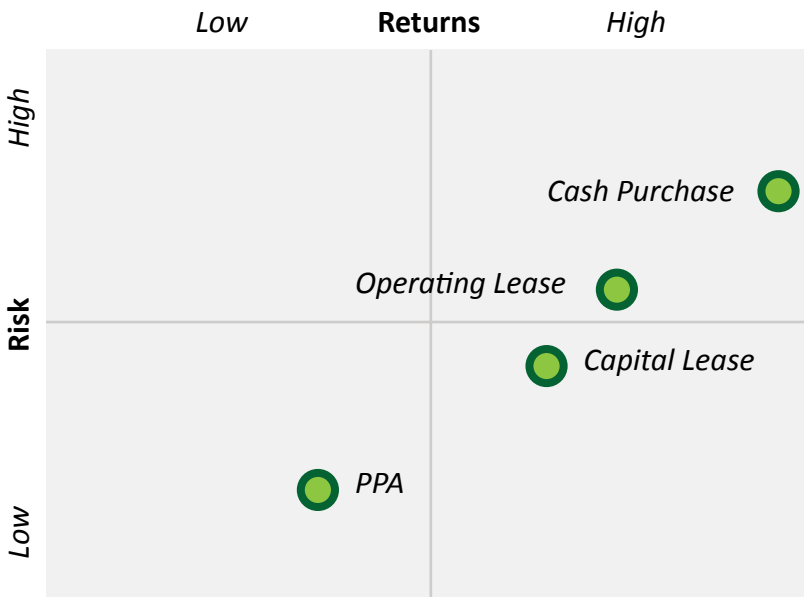

Cut hundreds of dollars off of your monthly electric bill using the unlimited free power from the sun with an IGS installed solar electric system for your business today!

Multiple Payment Options

- Cash payment
- Traditional financing
- Solar leasing options
- Purchase Power Agreement (PPA)

Commercial Solar Electric

Power Purchase Agreements (PPAs)

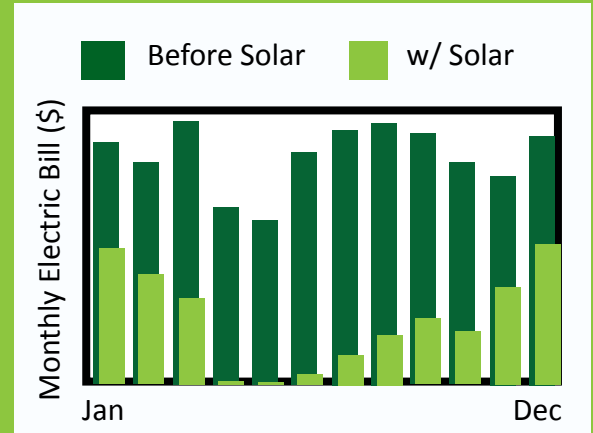

Under a PPA, IGS clients pay only for the electricity generated by the solar system - not the solar equipment, installation or any ongoing maintenance. A PPA arrangement lets you to reduce your carbon emissions and lock into long term, predictably priced power for the life of the agreement.

The PPA Purchase Process

- Design**
After a complete site survey and energy audit, IGS engineers will design a complete solar system specific to your facility's energy needs
- Installation**
IGS will completely manage the installation of your new solar electric system from beginning to final inspection
- Maintenance**
IGS will manage all of the necessary maintenance and upgrades to the solar system leaving you free to concentrate on your business
- Renewable Energy Credits (RECs)**
IGS will completely manage the distribution of RECs

Monthly Electric Bill Savings

Based on previous solar electric systems. Your financial results may vary.
