COMPANY INFORMATION GUIDE

OUR MISSION

IGS was founded in 2010 in Upstate New York with a focus on providing industry-leading solar energy consulting and installation to residential and commercial customers across the state.

Today, IGS has expanded to many states across the country and now provided energy efficiency consulting and upgrades as well. In 2015, IGS looks forward to continuing this growth and providing even more support to each and every customer through the continued growth of our team and the improvement of our backend infrastructure.

As solar energy continues to grow in New York and across the United States, IGS is dedicated to continuing to be a leader in our key focuses: energy efficiency consulting, solar energy installation and delivering the very best customer support.

At IGS we are dedicated to offering each customer the very best in solar energy technology, energy efficiency upgrades and total technical support. I personally give my stamp of approval on every customer's project. That is my personal guarantee.

WHAT OUR CUSTOMERS SAY

"What has impressed me most about IGS is their dedication, not just to doing the job and fulfilling our contract, but to assuring that the result is as good as it can be, going beyond what is required to get to what's needed to make the system perform not just well, but excellently."

Tim & Susan Larkin, Brookdale NY

MAKE POWER

Using Solar Energy Systems

Today's solar technology is more efficient and affordable than ever before. Utilizing various solar energy technologies, IGS is able to offer our customers solar power systems that have a dramatic impact on all areas of their energy bills.

OUR SOLAR POWER SYSTEMS INCLUDE

- Solar domestic hot water
- Solar space / radiant heating
- Solar electric (PV) systems

OUR SOLAR POWER

Solar Hot Water & Solar Electric Systems

SOLAR ELECTRIC

Complete Home & Business Power Systems

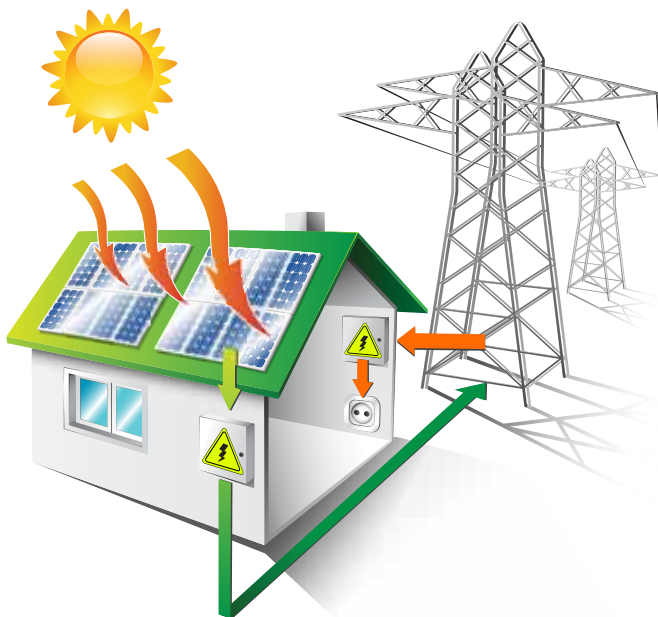

IGS keeps electric bills under control by offering customers low-cost electricity through today's leading PV Systems. Each system is custom engineered to meet the customer's specific power needs, climate, location and budget to ensure maximum performance and ROI.

SOLAR HOT WATER

Hot Water & Heating For Homes & Businesses

Keeping hot water and heating costs low is a crucial to home and business budgets in today's high-energy-cost world. By providing solar heated hot water and space heating systems, IGS offers customers everywhere an eco-friendly option for reducing heating energy costs.

SAVE POWER

With Energy Efficiency

With an emphasis on cutting energy costs and being greener today, energy efficiency upgrades are a fast and affordable solution for home and business owners across the United States and around the world.

IGS ENERGY EFFICIENCY UPGRADES INCLUDE

- Insulation testing and upgrades
- Heating and hot water system upgrades
- Lighting system upgrades

OUR ENERGY EFFICIENCY PROCESS

Lower Electric, Heating & Hot Water Costs

STEP 1

Scheduling

IGS is dedicated to working within the schedules of each of our customers. With professionals in states across the United States, IGS is able to schedule fast appointments for residential and commercial customers wherever we are needed.

STEP 2

Property Checkup

An initial home / business checkup is the real beginning of the energy efficiency process. Our energy efficiency experts visit each property and make a rigorous inspection of the heating, electrical and insulation systems to determine any weak points where savings can be found.

STEP 3

Energy Upgrades

All energy efficiency upgrades are completed by experienced professionals in their fields. This dedication to professionalism ensures that every single IGS customer receives the very best service, materials and support that is available in the industry.

STEP 4

Inspection

After all of the upgrades are completed, IGS performs a final checkup. This final step ensures that all of the work has been done correctly, all material components are working properly and all safety best-practices have been followed.

AN EXCITING FUTURE

Looking Back & Moving Forward

With small, local beginnings, IGS has grown over the years to become one of the leading solar installation and consulting firms in New York State. Over the years, record growth has established IGS as a household name in the solar industry.

Throughout the years, IGS has built partnerships with some of the leading solar energy manufacturers in the USA and around the world. This unique position gives IGS the ability to offer a variety of solar energy solutions to residential and commercial customers with an emphasis on the best-performing technology and affordability to meet most budgets.

Additionally, IGS works with a network of highly trained professional solar installers in states across the United States. These unique partnerships allow IGS to guarantee unrivaled installation services to customers.

In 2015, IGS is looking forward to close on some private equity funding opportunities which will allow IGS to expand their operations to additional states and to offer expanded services to those customers already being served. Additionally, private equity in 2015 will allow IGS to onboard additional staff and make several infrastructure improvements that will mean better service for every IGS client.

ENGINEERING

System Sizing & Design

IGS employs one of the best dedicated engineering teams in the solar industry. With decades of experience, IGS solar engineers have the experience and product knowledge to ensure that every IGS customer gets the right solar energy system, built with the perfect combination of solar components to meet their performance and budget needs.

INSTALLATION

Full Project Management

For years, IGS has been providing high quality solar installation services to residential and commercial customers across the United States and around the world. IGS has developed a network of professional solar installers in states across the country, which allows incredible quality control for the entire installation and support process for every IGS customer.

EXPANSION

Coming To More States

Through private equity investments in 2015, IGS is looking to expand its coverage area, providing solar installation and consulting services to customers in more states across the USA. Additionally, IGS is looking forward to investing in additional staff and infrastructure improvements that will offer an increased level of service and support to every IGS client.

RESIDENTIAL Efficiency & Solar Power

Today, homeowners face crunched budgets and increased living costs. Two of the highest (and fastest growing) costs that face homeowners today are their electric bill and their hot water / heating bills.

With a combination of energy efficiency upgrades, solar hot water and solar electric (PV) systems, homeowners can dramatically reduce their monthly energy costs and take back control of their budget.

COMMERCIAL Efficiency & Solar Power

From dairy farms to restaurants, from manufacturing and industrial facilities to military establishments, budgets are tight today and the ability to implement savings is at a premium.

Utilizing the latest in energy efficiency practices and the very cutting edge in solar energy technologies, IGS assists customers of all shapes and sizes cut their energy costs and free up additional capital for operations, expansion and providing additional service and support.
